Gary's Gab

Here it is the end of October already. Halloween is next Wednesday and then it's November. Remember, November 17th is the Albany Swap Meet. The President's luncheon is on December 8th at the NWVCMM in Brooks. We are still seeking Officers and Board Members for 2019. We will be asking members to step up and fill these positions. We need a Vice President, Secretary, three Board members and a Historian. In addition, we need your ideas for next year's programs and tours. It's going to be a busy fall. I hope to see you at these events.

Gary

Minutes of the Willamette Valley Chapter Model A Ford Club of America Board of Directors Meeting Held October 4th, 2018

The October 2018 Board of Directors Meeting was held after the General Meeting. Final arrangements were discussed for the presentation on Saturday the 6th. Additional discussion was held about the low attendance to the General Meetings.

Respectfully Submitted,
Gary LeMaster, President.

Cars For Sale

1930 Ford Deluxe 4dr Phaeton - Washington blue with Straw w/w wheels and pin striping. Restored over 15 years ago in excellent condition, runs well with excellent top. 6 volt with alternator. Hardened valves, new heavy duty radiator, and equipped with seat belts. Clear Oregon title. \$25,000. Contact Lew Garrison at 503-931-6072 or lewscars@gmail.com

1930 Model A Station Wagon. Model 150-B. This car was built from scratch with mostly donated parts over the last five years. All the wood was hand crafted like the original in my shop. It has a rebuilt engine, transmission, differential, new tires, turn signals, seat belts, and new upholstery. It only has 200 miles on it since completion one month ago. Runs great! \$30,000. Tom Morrison, Salem 503-364-3090 or 503-559-9797.

RESERVATION DEADLONE – NOVEMBER 7, 2018

President's Luncheon

The menu for the luncheon has yet to be determined and will be published when finalized.
The luncheon will be held in the new conference room of the museum.

Troubleshooting Chart 4-5 Electrical System

The electrical system includes the battery, battery cable, terminal box, ammeter, generator, main wiring harness, horn rod, horn, stop light switch, and all lights. The electrical system is dependent on a fully charged battery and a good grounding system. Poor connection is the most common electrical problem. Check all connections at the battery terminals, terminal box connections, ammeter and generator connections. These connections must be clean and tight. Check for a clean (rust free) headlight ball socket. The weakest component in the electrical system is the cut out relay. For increased reliability, the cutout can be replaced with a diode. A fuse should be installed at point (A), mounted on the starter. This will protect the electrical system wiring. A fire can be started by a short in the system (it has happened).

Symptom	Probable Cause	Refer To
1. Light Bulbs Burn Out (Frequently)	1. Poor Grounds Between Generator and Battery.	See Addendum
2. Horn Inoperative	1. Dirty Armature 2. Poor Contact At Light Switch 3. Defective Horn Rod	See Horn page 1-194
3. Battery Discharges	1. Defective CutOut	Replace CutOut
4. Ammeter Shows Discharge	1. Defective Cut Out	See Generator page 1-189
5. Ammeter Shows High Charge	2. Defective Generator	See Generator Adjust page 2-10
	1. Adjust Generator
